OUTPUT

You can have all the information you need at your fingertips through the complete archive of history consumption, charges, payments and applications maintained.

Develop your customer relationship and improve the productivity of your organization. The CCB offers your organization various specialized facilities.

A barcode on a bill is one of the many features offered. This makes creates efficiency as you can quickly and accurately read the bill with a barcode reader.

Customer service is always a high priority that is why this system supports services such as the filling of application forms and application approval as well as allowing them to be circulated electronically.

LAYOUT

Improve your access to information. You are provided with the availability of various statistical reports (e.g based on consumption, history, unaccounted consumption etc.) combined with their high quality formats, making them easy to understand, so you can greatly improve operational efficiency and productivity.

You are also given the ability to grow at low costs and short implementation periods due to the advanced administration levels of the CCB.

The CCB offers you easy to use software, which means data, can be kept up to date and accurate.

This helps improve the response times helping you better serve your customers.

This makes it easy to understand why the Utility Billing System has already been implemented at a large organization such as the Nicosia Water Board.
